SUMMARY STATEMENT

Software developer with over 15 years of experience. Driven by high-quality standards, I deliver software solutions to increase processes automation, effectiveness and efficiency on web, desktop, and mobile devices. Bachelor's degree in Computer Science.

WORK EXPERIENCE

Tech Lead, INSCALE – *Apr./2020 - present* - Lisbon, Portugal

INSCALE is an offshore company that builds tech talented teams with high-skilled local professionals focused on offering scalability for companies.

⋯→ Developed & maintained a containerized Authorization Server using C# and .NET (5 and Core 3.1) deployed through a CI/CD pipeline in AWS and Azure. The system is responsible for supporting both internal and external customers.

⋯→ Reviewed functional specifications and participated in the development of creative ideas for functionality, software solutions & tools, and other applications.

⋯→ Created technical design & specifications, and documentation & review of developed code.

⋯→ Guidance and technical leadership for a team of developers.

Software Engineer, Vision-box – *Mar./2019 - Apr./2020* - Lisbon, Portugal

Vision-box provides seamless and contactless solutions in biometrics, mostly in travel industry.

⋯→ Developed & maintained new and existing functionalities for Automated Border Control using C# and .NET (Framework 4.6+ and Core 2.0 & 3.1) with troubleshooting acceptance and production environments behaviors.

⋯→ Ensured system correctness through testing different devices and projects, according to system specifications and focused on client's needs.

⋯→ Maintained test scripts updated based on most recent documentation approved.

⋯→ Performed all tests required in different deployment environments creating specific & detailed reports.

⇢ Elaborated & presented structured technical documentation to clients (Dutch Ministry of Justice and Security & Amsterdam Airport Schiphol) reestablishing a good relationship with clients and regaining their confidence.

Full Stack Developer, NEXXYS – *Sept./2012 - Mar./2019 -* São Paulo/SP, Brazil

NEXXYS is pioneer by offering highly efficient management for advertising industry, mainly.

⇢ Developed & maintained many applications & back-end services using C# and .NET (Framework 2.0+, ASP.NET, Web API and windows services) to support company's operation deployed in a cloud infrastructure.

⇢ Reviewed functional specifications and participated in the development of creative ideas for functionality, software solutions & tools, and other applications.

⇢ Refactored legacy code in two core applications increasing the performance by ~35% during the time still an external consultant from DIGISYSTEM.

⇢ Created a real-time data delivery solution through a dashboard using SignalR and a mobile app increasing company's revenue by ~10%.

⇢ Guidance and technical leadership for a team of developers.
